I listen to XM Satellite Radio's traffic and weather channels. It's the first thing I listen when I get in the car. It lets me make a decision on how to get to work in DC. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.
